

Program Description

This after school / summer program is designed to provide an alternative instructional setting for general & special education students who meet one or more of the following criteria:

- Receiving home instruction
- Returning from alternative placements
- Experiencing academic failure
- Dropout risks
- Issues related to school avoidance, anxiety, depression, or other emotional/social concerns that interfere with attendance in a traditional high school setting

About Project SOAR

To qualify for Project SOAR, a student must be recommended by school personnel or by a parent. The referral form must be submitted by a School Counselor/CST member to the SOAR intake committee for consideration.

Once a student is enrolled into Project SOAR, the SOAR staff will enroll the student in the appropriate online instruction through Educere. SOAR staff will monitor attendance, participation, and the provision of support services. Through the Educere online program, students work at their own pace and are provided with a pace chart of assignments to be completed for each course. Online teachers grade the assignments and provide feedback to the students. Grades, progress, and the time spent on each activity can be viewed by students, parents, and SOAR staff.

**Transportation is available through arrangement

Program Options through Educere

A student may not need the full complement of services and can be accepted into the program for one aspect only. Students may be selected for participation in this program due to the following needs:

- **Credit Recovery** - recover credit for a failing course/courses
- **Academic Support** - individualized academic assistance offered by fully certified teachers
- **Full Academic Credit** - full year course credit for non-traditional students
- **Elective Course Options** - half year course credit
- ***Counseling** - daily opportunities for group/individualized counseling
